**SCOTLAND**

# Course Accuracy

Certificate Number:

**SCO\_11\_007**

Course Name: **KILLIN 10K ROAD RACE**

Race Name: **KILLIN 10K ROAD RACE**

Date of Race: **27<sup>th</sup> August 2011**

Distance: **10Kms**

Measurer: **Alan Young**

Date Measured: **20<sup>th</sup> May 2011**

Elevation change: **- 0.7m/km**

Start / Finish separation as a percentage of course length: **7.5%**

I have been notified that the course to be used for the road race on the above date will be exactly that which was accurately measured by a graded UKA Course Measurer using IAAF procedures approved for use in the UK. A complete record of the measurement has been filed by the Area Measurement Secretary.

To ensure accuracy, the race officials must consult the measurement report and check the exact location of the start / finish, route details and road restrictions specified by the measurer. Any changes must be checked by an accredited measurer and new certificate will then be issued.
